Blue student Health Form

A Student Health Information Form will be sent home with your child at the beginning of each school year. It is very important that you complete either the [English](#) or [Spanish](#) form and return it to the clinic immediately. This form includes emergency contact information for use by the clinic staff, as well as any medical conditions, allergies, medications and health concerns the school should know about regarding your child. If any of your information changes, please inform the school and clinic ASAP so we can maintain current information on your student.

Shot Records!

It is very important to keep your child up-to-date on [state required immunizations](#)! Please ensure the clinic has the most recent shot record for your child.

If you do not wish to have your child immunized for personal/religious reasons, please keep the appropriate [Conscientious Objector](#) form updated and in the school clinic.

Illness at School

CISD Health Services adopts the following policy regarding student illness:

Illness at school is evaluated by the health service staff in the clinic area. A child who demonstrates the following symptoms should be sent home from school:

1. Fever of 100 degrees or more.
2. Suspected contagious condition or disease.
3. Vomiting or diarrhea.
4. Severe stomachache, headache, or earache.
5. A child who is too ill to function in the classroom

Students who are ill should not return to school until symptom-free for 24 hours so as to

ensure a full recovery and prevent the spread of germs to other students/staff at school.

Clothing Changes

Sometimes our students require a clothing change at school due to bathroom accidents, lunch spills or other incidences where their clothes become soiled. It is recommended that each student keep a change of clothing in their backpack or in their classroom. This will keep the parent from having to bring a change of clothing for their child in the middle of the day.

The Snyder Clinic is also grateful for clothing donations for this purpose. If you have any gently-used clothes or NEW boys/girls underwear you are able to donate to the clinic the students and I would greatly appreciate it!

Lice

[Important information](#)
[Treatment](#)

It is important for every parent to help prevent the spread of lice. ***ALL parents should:***

- check your child's hair at least once a week
- check your child's hair more often if there is exposure to an actual case of lice from friends, family, or classmates
- check the hair **very carefully** if your child complains of head itching
- reminding your child to **NEVER** share a brush, hat, or helmet
- encourage your child to wear hair up if an active case of lice is identified in the classroom
- notify anyone who has come into close contact with your child should you discover he or she has a case of lice

Here are the things we are doing at Snyder to try and prevent the spread of head lice:

- If a teacher notices a student scratching his or her head excessively, the student will be sent to the clinic for a head check.
- Children will be allowed to keep their backpacks and jackets on the backs of their chairs.

- Teachers will continue to constantly look for ways to limit accidental head-to-head contact inside the classroom.
- Parents may choose to send a set of headphones for their child's use in the computer lab (**PARENTS NEED TO SEND THEM IN A ZIP-LOCK BAG WITH THE STUDENT'S NAME ON IT**).
